### **DETAILED ACTION**

Claims 1-4, 6-14, 16-23, 27-31, 33-42, 46-50 and 54 are pending and under consideration. The finality of the Office action of March 11, 2003 is withdrawn in light of the new grounds of rejection below.

Claim 6, 33, 47-50 and 54 have been canceled. Claims 1, 7, 9, 10, 11, 16, 17, 20-22, 28-31, 34-37, 39, 40, 41, 42 and 46 have been amended. Claims 55-59 have been added. Claims 1-4, 7-14, 16-23, 27-31, 34-42, 46 and 55-59 are pending and under consideration.

Sections of Title 35, U.S. Code not found in this action can be found in a prior action.

Applicant is reminded that the priority date of the instant application is March 7, 2001.

Claims 1-4, 10-14, 28-31, 35-42, 46, 55-59 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 55 recites an "improved kit" but fails to recite to what the improvement is in reference to.

Claims 1, 10, 28 recite "efficient immunomagnetic recovery". The term "efficient" is a relative term which renders the claim indefinite. The term "efficient" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. .

Claims 1-4, 7-14, 16-23, 27-31, 34-42, 46 and 55-59 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1, 7, 10, 20, 37 have been amended to recite the limitation "wherein said spectra are detected through the same spectral window"..

Art Unit: 1643

The specification teaches that  
*Labeling two different cellular components also allows facile dual labeling of control cells with two structurally and spectrally different fluorophores.*

This fails to provide support for the instant amendment requiring different emission spectra which are detected through the same spectral window because no mention is made of spectral windows in the disclosure.

Claim 28 has been amended to recite “wherein said stability provides efficient immunomagnetic recovery in rare cell analysis”. Claim 1 has been amended to recite “wherein said physical and biological stability provides efficient immunomagnetic recovery in rare cell analysis”. The originally filed disclosure fails to provide support for this amendment wherein specifically the stability of the control cell, per se, is the basis of enhanced immunomagnetic recovery.

Claim 16 has been amended to recite “wherein said stabilization does not alter light scattering and autofluorescent properties of the detectable label on the control cell. The originally filed disclosure does not provide specific support for preserving light scattering and autofluorescent properties.

Claim 35 and 55 recite the limitation of “cellular components and antigenic moieties of said control cells have been stabilized for at least six months”. The originally filed disclosure contemplates the control cell having a stability of up to six months and does not provide support for the instant new claim which requires that the control cells be in the process of stabilization for six months before they are part of the kit. Amendment of the claim to read “the control cells are stable” rather than “the control cells have been stabilized” will overcome this rejection.

All other rejections and objections are withdrawn in light of applicants amendments.

Art Unit: 1643

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
